Core Mechanics in a Nutshell

The backbone of **Mongoose Traveller 2E** is the 2d6 skill-based system. Each skill is rated on a 0–10 scale, and to perform an action you roll two six-sided dice plus your skill level, aiming to meet or exceed the target number set by the Game Master (GM). This simple mechanic keeps the focus on narrative and character decisions rather than dice-rolling minutiae.

Character Creation Made Easy

Character creation in Mongoose Traveller 2E is intentionally quick:

1. **Choose a Profession** – Pick from a range of career paths such as *Engineer, Pilot, Scientist, or Soldier.*
2. **Allocate Skill Points** – Distribute points to skills that fit your chosen profession.
3. **Roll for Attributes** – Attributes like Strength, Dexterity, and Intelligence are determined by rolling 2d6 and adding your chosen skill bonuses.
4. **Define Background** – Add a short backstory and personality traits to bring your character to life.

With this process, a player can be ready to roll in less than 15 minutes, freeing up more time for storytelling.

Mongoose Traveller 2E offers a variety of settings to suit every taste:
